

The Colorado Health Foundation™

Informational Webinars

We regularly host webinars for health-related nonprofit representatives to learn about our grantmaking, including a comprehensive overview of work underway and open funding that aligns with our focus areas and cross-cutting efforts.

These webinars are designed to help you determine what we support within each focus area, what to expect when completing an online application, the type of communication you will receive during the review process and how to contact Foundation staff for additional information or to ask questions. All webinars are recorded and archived for viewing. Participation is not a required part of the application process.
